HISTORICAL SKETCH.

While Bay Leaf High School has been in existence only six years, we claim for it that during those six years it has had a healthful and natural growth. In 1906 the idea of establishing a high school first caught fire, and under the leadership of some of the most enterprising citizens of the community, that idea matured and the high school was established. And the enthusiasm which led to the establishment of the school has not weakened from the first. We believe that a community, enthusiastic in the cause of education, is very essential, and almost indispensable, to the success of the school in that community: Here we have that genuine and enthusiastic school spirit which desires and is willing to sacrifice to accomplish what is desired. This of itself insures permanency to the school.

And, too, the school has not reached its present state without considerable sacrifice. The first year of the school a music room was built and a piano bought, which, in addition to other expenses, required some sacrifice.

The second year was marked by an addition of a farm to the school. This feature proved such a success that the size of the farm has since been increased, and the farm work looked after with more care. The farm is under the management of a supervisor who looks after the planting and harvesting and general welfare of the farm.

Owing to the increased number of boarders, a stock company was formed and a convenient fourteen-room dormitory built. This called for considerable sacrifice, but the community was found ready to respond to a call which had in view the welfare of the school.

In this connection we must not fail to mention the Woman's Betterment Association. This association was organized in 1908 through the efforts of Miss Edith Royster. The members of this association have raised and spent over two hundred dollars towards beautifying the school building and grounds and furnishing the school with conveniences. Through their efforts seventy shade trees were planted on the school grounds; the music room was painted, and a porch built to it; and last year a well was dug for the convenience of the school children.

LOCATION.

Bay Leaf High School is located thirteen miles northwest of Raleigh, and six miles from Neuse, the nearest railroad station. We have the advantage of daily mail and also a 'phone line to Raleigh.

The sites for the school buildings were admirably well selected. Driving north from Raleigh, one can see the dormitory for several miles before reaching it. It is built on a more elevated site than

the main school building, and commands a finer view of the surrounding country. The sunsets are beautiful from this elevated building.

Just across the fields in front of the dormitory and somewhat behind the school building rises a considerable hill, known as Adam's Mountain. This is one of the most attractive little mountains to be found. A winding roadway leads over it, all along which in the fall of the year one finds rich clusters of woodsgrapes, juicy muscadines, hazel nuts and other fruits of the forest. Coming down the roadway one returns to the school by a different course. The little mountain pathway, however, leads into a good road before it reaches the school. A circular driveway connects the building with the public highway.

AS TO HEALTH.

Bay Leaf is in the center of a remarkably healthful community. Its people do not know what malaria is, and well may it be so, for the community is practically free from those things that give rise to such conditions. We unhesitatingly recommend Bay Leaf to all who make healthfulness a consideration. Climatic conditions are unsurpassed, drinking water is excellent, and other conditions conducive to good health are not wanting.

DISCIPLINE.

We attach a great deal of importance to this feature of our school work. We are confident that no school with slack government can fully succeed, and we are equally certain that no school with strict discipline can be a total failure. Permanent good order in a schoolroom is indispensable to first-class school work, hence our discipline is reasonably strict. Our rule is, "Do right," and we endeavor to keep all pupils within reasonable limits of the requirements of this rule. We claim, also, that our discipline is kind and encouraging. We avoid everything that might seem autocratic, for we believe there is a more effective and a more desirable way to good discipline.

RELIGIOUS VIEWS.

The religious advantages of Bay Leaf are better than the average community can boast of. There is one church in the place, a Baptist church, and others of other denominations within easy reach. We have no regulations about attending church, but all are encouraged to be present at church services and Sunday school.

REPORTS.

At the end of each month a report, showing the progress of each pupil, is sent to the child's parents. Thus, parents are kept posted about the progress and work of their children. These reports are to be signed and returned.

COURSE OF STUDY.

In the main we carry out the course of study sent out by the State Superintendent. This course of study, the Latin-Scientific, is arranged with a view to meeting the demands of two classes of students: first, to those who contemplate going to college, to give that instruction and training that will enable them to enter the Freshman class. We try to lay a good foundation for the work that is to come after they leave the high school, and since the course of study is so arranged as to fit in with the college course of instruction, the student is able to pass from high school to college with few conditions.

The second class of students whose needs are largely met in this course of study is composed of those who for different reasons never expect to go to college. It is aimed to give them such instruction as the ordinary affairs of life will demand.

The courses of study from the first to the seventh grades are so well known that we will omit them here.

SOCIETIES.

There are two well-organized literary societies, the Eureka for the boys and the Hesperian for the girls. In these the students are given training in reading, reciting and debating.

EIGHTH GRADE.

Progressive Arithmetic (Milne), Elements of Algebra (Wentworth), English Grammar (Buehler), Latin Grammar (Collar and Daniell), English Composition, English History (Montgomery), Introduction to Science (Holden).

NINTH GRADE.

School Algebra (Wentworth), General History (Myers), English Literature and Composition, Latin Grammar (Collar and Daniell), Latin, Cæsar (Allen & Greenough), Physical Geography (Tarr).

TENTH GRADE.

School Algebra (Wentworth), Plane Geometry (Wentworth), General History (Myers), Rhetoric (Lockwood and Emerson), Latin, Caesar (Allen & Greenough), Latin, Cicero (Allen & Greenough), First Greek Book (White, elective), English Literature and Composition.

MEDALS.

Wholesome rivalry is always encouraged in the school, and various contests are held throughout the session to arouse and stimulate interest in the school work. At every commencement two medals are given: one to the boy delivering the best declamation, another to the girl giving the best recitation. These medals were won last year by Mr. Duma Arnold and Miss Bessie Ray.

PIANO MUSIC.

The aim of this department is to give a practical and thorough foundation in music—knowledge rather than display is sought. With this idea in view, much care is given to the development of a good touch and to the building up of a good technique. An effort is made to help the pupil to see and appreciate the best in music.

The compositions of Gurlitt, Kohler, Czerney, Duvernoy and other standard composers are used.

Apart from the regular piano lessons, special attention is given to theory and ear training. No additional charges are made for this course.

Music tuition is \$2.00 per month, piano rent 50 cents per month.

EXPENSES.

Board, including room, lights and fuel, can be secured in private families for from \$10.00 to \$12.00 per month. Board, including room, lights and fuel in the dormitory will not exceed \$10.00 per month.

Tuition for all high school students in Wake County is free. Those outside, \$3.00 per month; tuition in primary department (grades 1-3), outside of school, \$1.50 per month; elementary department (grades 4-7), \$2.00 per month.

EXAMINATIONS.

At the close of the term each student is required to stand written examinations on the subjects that he has studied. Occasionally, at other times than at the time for the regular examination, we have written tests. These tests are given not only for the purpose of testing the pupil's knowledge of the subject-matter, but also to fasten in his mind the important ideas.

A passing grade of 75 out of a maximum of 100 is required before a pupil is allowed to drop a study.

REGULATIONS.

All boarding students are expected to room and board at the dormitory.

Boarding pupils must at all times recognize the right of the Principal to give or withhold privileges.

Pupils are held responsible for all unnecessary damage to buildings or furniture.

COMMENCEMENT, 1913.

Thursday Evening, April 24th—Entertainment by Primary and Music Departments.

Friday Morning, April 25th—Address by Dr. Hubert M. Poteat, and presentation of diplomas by Prof. Z. V. Judd.

Friday Afternoon, April 25th—Declamation-Recitation Contests. Presentation of medals—Mr. Leon Brassfield, declamation; Mr. A. B. Breese, recitation.

Friday Evening, April 25th—Concert.

NEW QUARTERS FOR PRIMARY DEPARTMENT.

At the opening of the fall term of 1912, it was found that the school had grown so materially that new quarters had to be added for the Primary Department. As a result, a large new room has been added to the rear of the main building for the exclusive work of the first three grades. The courses of studies required by the State School Law have been carried out this year for the first time; and in order to do this it became necessary to add another teacher to the faculty. Instead of dividing the time now between the intermediate grades and the music department, the teacher of the grammar grades gives her entire time to that department, while the newly added teacher gives instruction in music and elocution exclusively.

The Commercial National Bank

RALEIGH, N. C.

**Solicits Accounts of Farmers and Business
Men**

**This Bank Always Keeps in Close Touch With
the Agricultural Interests of North Carolina**

Why Farmers Should Keep a Bank Account

Their bank deposit book affords them a complete record of their cash receipts, while the stubs of the checks are a perfect record of expenses and payments. Paying a laborer, a store account, or any other bill with a bank check is much safer than with money; because the person receiving the check must endorse it, and the check being returned to the maker by the bank, can be preserved as a receipt. Money deposited in a bank is not so easily and so often "fooled away" as when carried around in one's pocket. Farmers: try the experiment for one year of keeping a bank account and see if it does not pay you. A large number of the best farmers have accounts with us.

We are desirous of having farmers' accounts, even though small; for in this locality their accounts are sure to grow larger.
